THENDO MAKHERANA

Johannesburg | 0762114512 | thendomakherana@gmail.com | https://github.com/Thendo18

Frontend developer having a working background as a Developer/Engineer with two years of work experience and a working knowledge of the Backend. On my spare time, I like to play video games and make small projects to enhance my skills. I've worked on projects using ReactJS, Angular, Nodejs, etc. I also understand the basics of Azure B2C. Please review my experience to learn more about the abilities I acquired while working.

EXPERIENCE

OCT 2022- PRESENT

FRONTEND DEVELOPER

I am working on numerous projects using ReactJs.

JUN 2021 – SER 2022

JUNIOR SOFTWARE DEVELOPER TEAM LEAD

I was a Team Leader in charge of a team of full stack engineers who worked on both the frontend and the backend. I always made sure that my team meet for daily stand-ups to track how far they've gotten with the project app and to offer help if required. I helped my team with a lot of projects that needed to be presented by assisting them in planning and developing the project in preparation for the Sprint review, which took place every two weeks. Collaborated with the other team leaders on a project involving Next.JS, a company-required software. JavaScript, Typescript, HTML, SCSS/CSS, and MongoDB are some of the programming languages I use. Frameworks/Libraries I use include Angular, NestJS, Typescript, Bootstrap, React JS, and Next.JS. Other: GIT, Docker, MySQL, etc.

EDUCATION

APRIL 2021

BSC MATHEMATICAL SCIENCE (COMPUTER SCIENCE AND STATISTICS) UNIVERSITY OF LIMPOPO

DEC 2016

MBILWI SECONDARY SCHOOL (MATH'S AND SCIENCE)

SKILLS AND CERTIFICATIONS

- Programming Languages: JavaScript, Typescript, Html, SCSS/CSS, MongoDB
